WELCOME TO OUR OFFICE!

.....,20.....

Dear.....

Thank you for making your first appointment with our Office!
We look forward to meeting you and discussing with you your dental needs. My staff and I understand that visiting a new dental office is sometimes intimidating and that you may have many questions and concerns. Our goal is to provide a quality service in a relaxed and professional manner. Feel free to ask any questions while you are with us.

To assist you, we are enclosing the following information:

1. Medical/Dental History form: Please complete this before you arrive.
2. Release of Information form: We can request your dental records from your former dental office if you wish. Please return this form to our office prior to your visit.
3. Appointment Card confirming your visit.

FIRST VISIT ROUTINES:

Most patients spend approximately an hour and a half on their first visit. First we register you in our computer, record any Dental Insurance data and review your medical Dental history before we start your dental treatment. Please bring all required information such as a list of all medications and allergies to expedite this initial registration process.

When you are scheduled for a "New Patient Examination" you will receive a comprehensive exam by Dr. Derrick along with any necessary radiographs that he may order to assist him with the evaluation of your oral conditions. If any treatment is suggested, we will discuss this with you and provide a written estimate.
